## Emergency and urgent care: What's the difference?

An **emergency** is when you are so sick or hurt that your life or health is in danger if you do not get medical help right away. A behavioral health emergency exists when you have feelings of hurting yourself or others. You should go to the hospital emergency room (ER) only when there is a life-threatening issue.

**Urgent care** is for conditions that are serious but not emergencies. Urgent care centers offer quick services for issues such as:

- Flu or cold.
- Earaches.
- Sprains.
- Rashes
- Minor cuts and burns, and minor eye injuries.

If you're not sure where to go, call your PCP to help you decide if you need to go to the ER, an urgent care center, or the PCP's office. If you cannot reach your PCP, our 24/7 Nurse Call Line is always there for you at **1-855-398-5615**.

- 2 months.
- 4 months.
- 6 months.
- 9 months.
- 12 months.

- 18 months.
- 24 months.
- 30 months.

Children ages 3 to 21 should have a well visit each year.
