Subject: Free Buprenorphine CME Training Opportunities for OB Providers

Listed below are free Buprenorphine CME trainings available for OB providers, recommended by AHCA.

Please take advantage of these opportunities as they support AHCA's efforts for reducing rates of Neonatal Abstinence Syndrome (NAS) and improving birth outcomes for members.

The Florida Perinatal Quality Collaborative (FPQC) is offering two free continuing medical education (CME) trainings on Buprenorphine use in obstetrical practice, found at: <https://vumc.cloud-cme.com/course/search?p=4000&curriculum=TIPQC>.

The first module describes the basics of Buprenorphine treatment during pregnancy, and the second module details how to implement prescribing for Buprenorphine in your obstetrical practice.

Additionally, a training webinar entitled "Adding Buprenorphine Treatment in Obstetrical Practice: Lessons Learned", found at: <https://tipqc.org/tipqc-fpqc-training/> will be held on **Tuesday, January 18th at 4:30 PM ET**, and can also help answer additional questions or concerns.

For your convenience, we have also placed the links to the above-mentioned trainings on our website, www.amerhealthcaritasfl.com > **Providers > Training and Education**.

If you have any questions about this notification, please contact your Provider Network Account Executive or call Provider Services at **1-800-617-5727**.
