# **Knowledge Is Power**

The more you know about diabetes, the more power you can have over this disease. A great way to start is to learn about the exams or tests you need. Diabetes can affect many parts of your body. Because of this, you need to have regular checkups to catch problems early. You also need to know your results. Remember, knowledge is power!

On the back of this sheet is a diabetes exam log. You can write the results of your tests on it to track your progress. Take this sheet with you to the doctor. Your doctor can help you fill out the form. Ask what your target results should be. They are not the same for everyone. Keep this log where you will remember to take it with you to the doctor.

## **Know your numbers**

### **Blood pressure**

Try to keep this below 120/80 to lower your risk of heart and blood vessel problems.

#### Foot exam

Check your feet daily for redness, cuts, sores, and blisters. Your doctor should also check your feet at every visit.

#### Track your weight

Even small changes in weight can make a big difference in your blood sugar levels.

#### Dilated eye exam (1 time a year)

Make sure the eye doctor dilates your eyes to check your retina. This is important even if you can see fine. They can catch and treat eye problems early and save your vision.

#### A1c (at least 2 times a year)

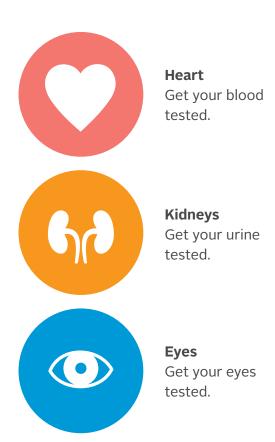

This test tells your average blood sugar level over the last 3 months. This should usually be less than 7.

#### LDL level (1 time a year)

This is the "bad" cholesterol. Keep it under 100.

#### Microalbumin test (1 time a year)

This tests for protein in the urine, which is often the first sign of kidney problems.

#### **Knowledge Is Power**

Take this form with you to every doctor visit.										
Diabetes exam log for:				Date:						
Doctor name: Doctor phone number:										
	Blood pressure (each visit)			Usual goal: below 120/80			My target:			
Date										
Result										
	Foot exam (each visit)						My target:			
Date
